Michael:

I'd be happy to join you - only constraint is that I will be in my office only a limited amount of time tomorrow (Weds) morning; I will be available from 9-10 and then again from about 10:45 -12:30.

If I'm not available, please consider working with my colleague, Professor Eugene Wagner (office is CSC-107, phone if 4-2861) who also served on the renovation committee. In the event he is not available, Patty Paton (office is CSC-232, phone is 4-8200) is familiar with many aspects of our needs.

To reiterate, at the least, we will need, for each class in those rooms...
Overhead projector
Large screen for overhead projector (if the permanent ones are not yet installed)
Chalkboards (being handled by Physical Plant I believe)
Sound system (??)

My own class, MWF, 10-11 in CSC-12 will also need a data projector (the set up from last Fall and Spring will work for me again until the permanent equipment is installed). I again will use my own computer. I don't specifically know of other faculty needs for data projectors, but I'm sure that it will widely be used. I assume people were counting on it also be routinely available when they needed it, without prior arrangements.

On a different note, we are hard at work trying to design the 3D stereo projection capabilities of CSC-12B. Ed G. knows a little about what we want to do. The Minutes from yesterday's meeting are posted on the renovations web site (<http://cwt3.chem.pitt.edu/~joeg/RENOVATIONS/index.html>). If you have any insight to offer us, we would love to hear about it. We very much would like to demo this for the University on Panther weekend!

I appreciate the rapid and timely response!

Cheers,

Joe G.

A successful individual typically sets his next goal somewhat but not too much above his last achievement. In this way he steadily raises his level of aspiration.
