Ed:

Yes, we must have dlp projectors for this stereo project. As we are only worried about 12B for stereo - one could argue about the necessity of dlp for 12 and 12A; but the fact remains, we must have them for 12B. But if you buy identical projectors for 12A and 12B, that will solve lots of problems. Then I need to raise the money to buy a third, identical unit, to double up in 12B (and I'm still working on that).

Do you want to meet and talk about them - or do it by phone? The rest of the hardware for the 3D project has been ordered so we are still on track for a successful test for 10/13. We probably should figure out the projectors asap so that they are here and ready to go by then.

Cheers,
Joe G.
